Sea Stewards (\$20) **NEW!**
July 7 - 9, Weds. - Fri., 9 AM - 2 PM

ENTERING GRADES 3-6:

Coastal Adventures (\$225; \$200 FOM discount)
Session II June 21 -July 2, 8:30 AM - 1 PM
Session III July 5 -July 16, 8:30 AM - 1 PM
Session IV July 19 -July 30, 8:30 AM - 1 PM

* Cover Photograph: White & purple urchins found in local waters

Course Descriptions

BEGINNING COASTAL PHOTOGRAPHY

An introduction to nature photography. Students learn perspective, subjects, lighting and framing techniques through field work, editing, and photo projects. Cameras, prints, and developing included.

BOATS AND MODELS

Build a model of a trawler or a tug boat at the museum's Watercraft Center. Use museum exhibits and take field trips to learn about coastal waterways, local boats and the skills needed to work on and around the water.

COASTAL ADVENTURES

Coastal Adventures is a two week course filled with daily field explorations and activities at local area museums, coastal trails, shores and beaches. This course may enable students participating in designated afternoon Junior Sailing sessions to enjoy a full day of museum programs, from 8:30 AM until 4:30 PM daily (including supervised lunch break). Students who register for Coastal Adventures are NOT required to enroll in the Junior Sailing Program (and vice versa). For "full-day" students, applications must be completed for both the Summer Science School class and the Junior Sailing Program session.

FISH AND FISHING

An introduction to coastal fish and fishing methods. Cane poles, bait, and tackle are provided for dock fishing. Students then board a research vessel to trawl and dredge and identify more types of marine life.

PIRATES I & II

Explore the life of pirates at work, play, and in battle through hands-on activities suitable for the age group.

PRESCHOOL STORY TIME & CRAFTS

Includes a story, estuarine critter observation, and a related craft. Registration required, free of charge.

SALTWATER SCIENCE

Students investigate wildlife and water quality while exploring coastal waters and ecosystems of the Rachel Carson Reserve.

SEA STEWARDS **NEW!**

Field course designed for students seeking to volunteer with local marine conservation efforts. Participants will learn to use kayaks for shoreline cleanups, recycle monofilament fishing line, and create improved coastal habitats.

SEARCHING FOR BLACKBEARD **NEW!**

This field course investigates historic and geographic aspects of Blackbeard's piracy legends in NC. Visit important sites and learn professional field techniques from staff archaeologist David Moore.

SEASHORE LIFE I & II

Investigate coastal marine life with an emphasis on adaptations and food chains of the tidal flats, salt marshes and sounds on local islands. Field based classes include ferry ride, barrier island hiking, and animal identification.

Application

One form per student please.
Detach and send or deliver application with the course fee to:

Summer Science School
North Carolina Maritime Museum
315 Front Street, Beaufort, NC 28516 - 2124

Make checks payable to the Friends of the Museum. Cancellation policy: The course fee, less a \$10 handling fee, will be refunded only if notice of cancellation is received at least two weeks prior to the beginning of the scheduled course.

Student (has) (has no) medical or special needs. If so, these will be discussed with the museum staff at least two weeks prior to the start of class.

Student's name _____
